SUMMARY

Software Development Engineer with 2+ years of experience building scalable full-stack applications using Java, Spring Boot, React.js, Node.js, and AWS. Proven track record of improving product adoption, optimizing backend performance, and delivering enterprise-grade features for high-scale applications. Strong expertise in REST APIs, microservices, system design, and building reliable, maintainable solutions in Agile environments.

TECHNICAL SKILLS

- **Languages:** *JavaScript, Typescript, Java, Python*
 - **Frameworks:** *Node.js, Angular, Spring Boot, React.js, Express.js*
 - **Software Design & Practices:** *System Design, Microservices, REST APIs, OOP, Agile, Scrum*
 - **Cloud:** *AWS (Lambda, EC2, S3, API Gateway)*
 - **OS & Databases:** *MongoDB, MySQL, Redis, Linux*
 - **DevOps & CI/CD:** *Docker, Kubernetes, Jenkins*
 - **Tools:** *Webpack, Mocha, Chai*
 - **Version Control:** *Git, GitLab, GitHub*
-

WORK EXPERIENCE

Software Development Engineer II - Darwinbox Digital Solutions

Mar 2026 - Present

- Improved product adoption by implementing a Report Web View feature, resulting in a **37% increase in report usage** and reducing dependency on manual report downloads.
 - Enhanced onboarding workflows and backend integrations, contributing to a **20% reduction in onboarding-related support issues**.
 - Developed scalable backend services and RESTful APIs using **Java, Spring Boot, Node.js, and TypeScript** for enterprise onboarding and reporting systems.
 - Designed modular frontend components using **Angular and React.js**, improving UI maintainability and accelerating feature delivery.
 - Optimized backend workflows, API response handling, and database interactions to improve application scalability and concurrent request processing.
 - Collaborated with cross-functional engineering and product teams to deliver enterprise-scale features following Agile and Scrum methodologies.
 - Contributed to performance optimization, debugging, and production issue resolution to improve platform reliability and user experience.
-

Software Development Engineer I / Software Engineer Intern - Darwinbox Digital Solutions

Feb 2024 - Mar 2026

- Developed secure backend services and REST APIs using **Spring Boot, Express.js, and MongoDB** for onboarding workflows, authentication, and employee management systems.
- Designed scalable database schemas and backend modules to streamline data retrieval and improve maintainability.
- Implemented authentication and authorization workflows using secure access control mechanisms.
- Participated in API integration, backend optimization, debugging, and feature enhancement activities across enterprise HR platforms.
- Worked in Agile development environments with code reviews, sprint planning, and collaborative feature delivery processes.

PROJECTS

LLM-Powered Report Automation Tool

Python, Automation Pipeline, LLM Integration

- Built an automation tool that generated dynamic Python scripts from natural language prompts to streamline complex report modification workflows.
- Reduced manual effort involved in repetitive reporting tasks by automating script generation and execution workflows.
- Designed input validation and processing pipelines to improve reliability and ensure secure execution of generated scripts.
- Leveraged LLM-based prompt workflows to accelerate report customization and operational efficiency.

Live Streaming Platform — Full Stack

React.js, Node.js, Express.js, MongoDB, AWS IVS

- Designed and developed a scalable live streaming platform supporting secure authentication, concurrent streaming sessions, and virtual event management.
- Built backend microservices and REST APIs using **Spring Boot and Node.js** for event scheduling, user management, and streaming workflows.
- Integrated **AWS Interactive Video Service (IVS)** for secure low-latency live streaming and real-time playback support.
- Developed reusable frontend components using React.js to improve UI consistency and scalability.
- Implemented scalable backend architecture and database models to efficiently handle concurrent users and streaming operations.

ACHIEVEMENTS AND CONTRIBUTIONS

- Recognized for improving system performance, scalability, and reliability through architectural optimizations.
- Achieved a 37% increase in report usage by implementing a Report Web View feature, enabling clients to access reports seamlessly without the need for manual downloads.

EDUCATION

B.Tech in Computer Science and Engineering

Sree Vidyanikethan Engineering College
Tirupati, Andhra Pradesh

Jan 2021 - May 2024

CGPA: 9.1/10
